

Reference: System Requirements

Operating Systems:

- Windows 98, SE
- Windows NT (Service Pack 4.0 or greater)
- Windows 2000, ME
- Windows XP

Minimum Computer Requirements:

- Pentium II 200 mhz
- Monitor resolution of 800 x 600
- 64 MB ram
- 150 MB free hard disk space
- CD ROM
- Available communication port or a RS232-to-USB connector for each device (audiometer and spirometer) requiring a COM port.
- Computer should be located near the spirometer or audiometer (see note below)

Recommended Computer Setup:

- Pentium III 450 mHz
- Monitor resolution of 800 x 600
- 128 MB ram
- 500 MB free hard disk space
- CD ROM
- COM 1 and COM 2 available
- Internet access
- Minimum 68K network access bandwidth (for distributed configurations)

Note: Maximum cabling length distance from computer to audiometer or spirometer is 50'.
Cables over 10' have to special ordered and additional costs will apply.

Add'l Note: The only printer module that will work with a Puritan-Bennett spirometer is a HP 5650.
