

# Expect Sound Results

## *freedom* **2** INFRARED Amplification System™

With *Soundfield Amplification Systems* from *Lifeline*, you're investing in the success of both teachers and students in all standard classroom settings. Our high-quality classroom systems amplify the teacher's voice for all students to hear. With *Lifeline's* equipment packages and customer support personnel, you can expect sound results.

Our experts know the **Freedom 2 Infrared Amplification System** will bring successful communication and learning into the classroom. Gone are the days of vocal strain for teachers and diminished attention spans for students. With *Lifeline* systems, both teacher and student benefit from clear message transmission.

### Benefits Of Infrared

The **Freedom 2** system uses infrared wireless technology. With infrared you never have to worry about interference from other wireless systems. Infrared is line of sight specifically within the room the talker is located. The **Freedom 2** is a two-channel infrared system making team teaching very easy. The **Freedom 2** system has several different speaker and microphone options available. If interference is a concern- The **Freedom 2** is your answer!
